Best Infrastructure Maintenance Inspections Platform: Scopito

'Damage assessment in a single click' is the simple but revolutionary approach to visual inspection data that is driving Scopito, the leading software platform for visual data management. Recognising the value of time which is regularly wasted on tedious tasks, Scopito adheres to the three principles of simplicity, scalability and fail fast in their platform, which uses automation and machine learning to make the management of critical infrastructure assets as fuss-free as possible, leaving their customers free to focus on the bigger picture.
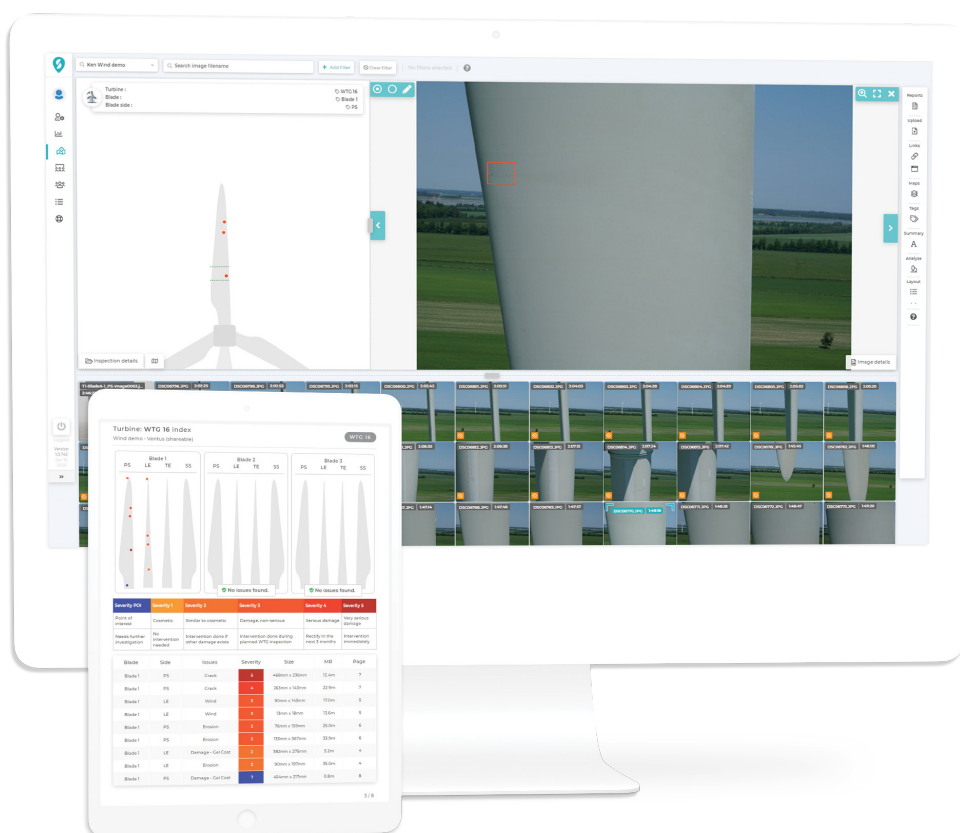

Based in Denmark, Scopito is the leading software platform designed for simple and effective management of visual inspection data. Using automation and machine learning technology, the digital platform simplifies managing governance, risk and compliance of critical infrastructure assets, freeing users from tedious tasks and allowing them to deal with the bigger picture.

Integrating features such as AI analysis, on-premise installation and custom integrations and development with digital twin technology, historical data and real time risk assessments, the Scopito platform leverages AI, predictive maintenance and big data to turn raw data into valuable business intelligence. In turn, this allows asset owners to prioritise their maintenance activities and make informed decisions based on the insights gathered by Scopito's simple, functional and advanced platform.

As a result, Scopito is today trusted by more than 5,000 companies across the globe who range from smaller drone service providers to large utilities. This vast array of users operates in many different verticals, predominantly in inspecting powerlines, buildings, wind turbines and solar PV facilities.

The beauty of the Scopito platform's simplicity is that for smaller companies, they can use it without ever needing to seek assistance from the Scopito team. For larger organisations, the process continues to be simple, but Scopito's versatility means that they are able to create bespoke features such as customised AI for more complex projects. In this case, strong communication is vital and Scopito leads constructive meetings with clients so that they can identify the requirements of those involved with the project. The team needs to know where their time and energy is best invested and as such, regularly uses visual materials to strengthen their understanding of the clients' goals for their project.

The commitment to open and transparent communication does not waver after initial meetings, as Scopito likes to keep clients in the loop throughout the creation process and ensure that everything is running smoothly once the client has started using the product. Clients are therefore given an excellent service experience, that is compounded by the delivery of a high-quality product that boasts intuition and effectivity. As a result, Scopito sees a lot of repeat business and new business that is generated by positive referrals.

Scopito therefore takes great pride in the team that has built the platform and company around it. A close-knit culture that promotes positivity, fulfilment and a healthy wellbeing for every member, Scopito thrives thanks to its team made up of individuals brimming with ingenuity, creativity, passion and skill. Through collaboration and innovation, Scopito has come together to create something remarkable; their team of expert developers has created a user-friendly and speedy product, the sales-team have curated strong, trusting relationships with clients and the marketing team draw in more potential customers every day with their comprehensive and interesting information about the market, visual inspections and data management. The unity of usability, trusting relationships and shared knowledge has already seen Scopito achieve exceptional growth and success, and will continue to do so as the company looks ahead.

Indeed, with their visions set on their ambitions of growth and evolution throughout the next five to ten years, Scopito is adamant that their values will remain consistent. The qualities that got them where they are today will be the driving force for years to come, as Scopito continues to be a personable and knowledgeable leader of the data management sector.
